Senator Mike Crapo
Ranking Member, Water and Wildlife Subcommittee
U.S. Senate Environment and Public Works Committee
456 Dirksen Senate Office Building
Washington, DC 20510

Senators Cardin and Crapo,

We write today in regards to S. 1816 and the efforts to expand and reauthorize the Chesapeake Bay Program. We ask that these comments be entered into Congressional record as part of the November 9, 2009 hearing on “Great Body Water Legislation” before the Senate Environment and Public Works Subcommittee on Water and Wildlife.

Across the Chesapeake Bay watershed and nation, our agricultural producers and organization members are very concerned about the implications of S. 1816 and believe it does not soundly or efficiently achieve the goal of improved water quality in the Chesapeake Bay. In effect, the legislation places a cap on the watershed’s economic growth – impacting jobs, development, and food production. This bill will impose severe economic hardship to our industry and further increase pressure to the Chesapeake Bay’s most effective and efficient land use, production agriculture, to move out of the watershed.

Through codifying executive and regulatory authorities, S. 1816 will hamper innovative solutions in areas such as nutrient trading, economic growth, farm adaptive management and overall water quality restoration. Without adequate time and science to effectively work through processes such as the drafting of the Chesapeake Bay Total Maximum Daily Load (TMDL), S. 1816 will impose burdensome regulations and penalties before defining procedures and practices that are proven to efficiently achieve desired water quality goals. This accelerated course of action is expensive and damaging to the watershed’s economy, viability of our agriculture sector, and overall water quality objectives.

We ask the Water and Wildlife Subcommittee to reauthorize the existing Chesapeake Bay Program without dramatically expanding federal authorities. We believe adequate time should be given to develop creative ways for economic recovery and growth to partner with water quality goals, as well as to refine the science and modeling in the watershed. Our organizations look forward to continuing discussions with you regarding this critical issue and thank you for the opportunity to comment.
Senators Cardin and Crapo
